SUMMARY

Backend Developer with hands-on production experience building scalable Java/Spring Boot systems, AI/ML-integrated platforms, and CI/CD pipelines. Microsoft Certified DevOps Engineer Expert. National-level Smart India Hackathon delegate and college hackathon champion. Published open-source Java libraries on Maven Central and maintain live systems serving 200+ real users.

EXPERIENCE

Independent Software Developer | *Self-Directed / Personal Projects*

Aug 2025 – Present

SynapseCityOS | *Java, Spring Boot, React, AI/ML, REST APIs*

- Engineered a modular smart-city OS platform, integrating AI-driven civic services into a unified Spring Boot microservices backend with scalable REST API interfaces and event-driven data pipelines.
- Deployed a dynamic service registry and automated decision workflows enabling real-time city resource management across multiple modules.

CivicBridge AI | *Spring Boot, React, Flutter, PostgreSQL/PostGIS, Firebase, Docker*

- Delivered a multi-platform civic engagement system (Web + PWA + Flutter) with multilingual NLP responses and PostGIS geospatial queries for location-based resource discovery.
- Implemented offline-first SQLite sync for low-connectivity regions; enforced HIPAA-compliant Spring Security JWT authentication and Docker Compose orchestration.

College Management System | *Java 17, JavaFX, React 18, PostgreSQL, JWT, BCrypt*

- Delivered a hybrid ERP (JavaFX desktop + React web) achieving 1:1 feature parity across 50+ modules (attendance, timetabling, hostel, library, placement), serving 243+ live student records.
- Built a custom Java HTTP API framework with no external framework dependency, including a native schema MigrationRunner, N+1 query optimizations, and BCrypt-secured RBAC across 4 user tiers.

GrowFund | *React, Node.js, PostgreSQL, Firebase*

- Shipped a gamified financial-literacy application for Indian farmers using farm-specific investment scenarios and interactive gameplay to simplify wealth-management concepts, with multilingual support.
- Designed and secured a REST API backend with JWT authentication, progress tracking, dynamic scenario generation, and Firebase real-time notifications.

Smart Attendance System | *Python, OpenCV, Face Recognition, Flask, SQL*

- Automated real-time face-detection attendance capture using OpenCV, eliminating manual roll calls at scale.
- Built a Flask REST API with SQL database integration, report generation, and role-based access control for faculty and administrators.

EDUCATION

Bachelor of Technology in Computer Engineering | *Swarnim Startup & Innovation University (SSIU), Gandhinagar, Gujarat, India*

Aug 2025 – Aug 2029

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Oracle, 2025
- IBM Software Engineering Professional Certificate — IBM / Coursera, 2025
- Deloitte Australia Cyber Job Simulation — Deloitte / Forage, 2025
- Google Cloud Fundamentals: Core Infrastructure, 2025

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), C++, SQL, Bash/Shell Scripting, Python

Backend & Frameworks: Spring Boot, Spring MVC, Hibernate ORM, REST APIs, Maven, JUnit

Frontend: React.js, HTML5, CSS

DevOps & Cloud: Azure DevOps, Docker, Kubernetes, GitHub Actions, CI/CD Pipelines, Azure Cloud

Databases: MySQL, PostgreSQL, MongoDB

Tools: Git, GitHub, Postman, IntelliJ IDEA, VS Code, Linux

Concepts: Microservices, System Design, OOP, Agile/Scrum, Data Structures & Algorithms

ACHIEVEMENTS

Smart India Hackathon (SIH) — National Participant | *Ministry of Education, Government of India*

2025

- Selected to represent the institution at India's premier national-level hackathon organized by the Ministry of Education.
